

# DO TRY THIS AT HOME

issue #98

Featuring: **Marvin and Milo**

**What you need:** • Empty glass jar • Oil • Water • Food colourings in different colours

This grey rain is so boring Milo. Let's make some colourful rain instead.

Fill up a jar with warm water.

In the lid, mix a few tablespoons of oil with a few drops of food colouring.

Pour this mixture into the water. A stream of colour will now start falling down.

Food colouring and oil don't mix, and as the two separate the food colouring sinks into the water, leaving trails of colours.

Vic Le Billon
