

16

An astronaut goes for a moon walk.

Look at each of the sentences below. For each sentence, put a tick (✓) in one box to show if you think it is true or false.

		True	False	Don't know
a	There is no gravity on the moon, because it has no atmosphere. So he feels weightless.			
b	He can jump up and down easily, because gravity on the moon is only one-sixth as strong as on Earth.			
c	The force of gravity on the astronaut is bigger than on Earth.			
d	If the astronaut drops a spanner he is carrying, it doesn't fall. It just floats beside him.			
e	It is much easier to start and stop a Moon buggy moving than on Earth, because its weight is less.
